## mymobilephone launches 1<sup>st</sup> multiplayer Java game

### 1<sup>st</sup> multiplayer Java game launched - CannonsME

mymobilephone.com.au has launched its first multiplayer Java game CannonsME. CannonsME is a fast and fun multiplayer arcade game that allows you to play against 2 - 4 players from all over the world! Collect power-ups and chat to your opponents.

The game works for 30 Days - after which time the user must repurchase and download again. CannonsME launched earlier this week is available to customers using Telstra, OPTUS and Vodafone networks and selected affiliated networks and service providers.

### about CannonsME

CannonsME is a networked Java multiplayer game that allows 2-4 players to simultaneously play against each other over today's GSM, GPRS and 3G networks. It does not contain a single player mode, so all players playing are always playing on the network. Games last between 2 and 5 minutes each and generate very approximately 5kb of network traffic per user per minute played per player. See below for some sample screen shots.

Sample screenshots of CannonsME.

To purchase the game, call 1902 269 053 and follow the instructions. Use the application code **16923**. Cost is \$20 fixed rate, mobiles and payphones extra.

### about Java games

Java games are the latest form of gaming available for mobile phone users. Java games are downloaded to a mobile phone in a similar way to a ringtone, logo or picture message but instead of being made up of one or more sms messages, they are small program which is saved in the memory of the phone. The game can be accessed from the menu system of the mobile phone.
